

The background of the entire page is a vibrant orange color. Overlaid on this background are various white line-art sketches of architectural and furniture designs. In the top left, there's a sketch of a kitchen area with a long counter, two stools, and three pendant lights. To the right, there are sketches of several different chair designs, some with high backs and others more modern. In the bottom left, a sketch shows a door with a handle and a small window. Next to it is a sketch of a closet or wardrobe with hanging rods and shelves. In the bottom right, there are two square tiles with a diamond or checkerboard pattern. The central logo is a white rectangle with the text 'EBM' in large, bold, dark blue letters, a small orange triangle above the 'M', and 'SWITZERLAND' in white letters on an orange rectangular background below it.

Security Doors

We produce security doors in variations: single-leaf, double-leaf and according to the individual wishes of the customer.

The door stem is made of box profiles 1.8 mm thick and plasticized in color according to the RAL tone chart.

Wing frame made of box profiles 50 × 30 1.5 mm thick.

Sash thickness 68-72mm.

The outside of the wing is completely lined with 1mm thick sheet metal.

Locking option with different types of security lock: lock with cylinder and guard for cylinder that prevents drilling and breaking or cash lock with guard that prevents drilling and breaking.

Wide-angle (200°) spy.

6 locking points.

3 fixed spikes on the side hinges.

MDF cladding with foil in several different wood decor patterns, 10mm on the inside and 6mm on the outside of the sash.

Thermal and sound insulation is provided by a 5 cm thick filling made of stone wool or styrofoam.

Two hinges with bearings.

Tire seal on the stem and door leaf.

Additional options: additional lock, molding on the stock, complete MDF trim.

YOUR SAFETY IS OUR FIRST PRIORITY

Room Doors

We make room doors from MDF, with a span at the request of the investor: honeycomb filling (honeycomb soda), plywood door filling, solid wood filling.

Finishing and design of the door is made in different options: MDF veneered or painted, finishing of the door from melamine foil in the decor or pattern, finishing from pvc foil from a foreign supplier.

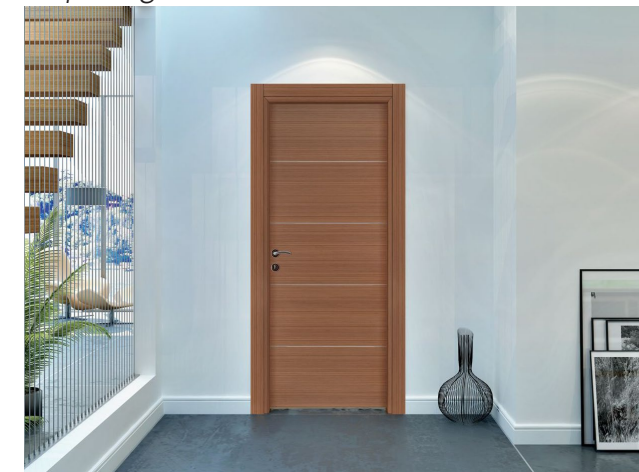

High quality hardware: lock with magnetic closing option, hinge option with hidden installation.

Adjustable door jamb for wall thickness from 8cm to 29cm (thicknesses over 29cm are possible on request).

Universal - left / right; during installation, the opening direction is determined.

Attested and certified.

Suitable for residential and commercial buildings and common methods of exploitation.

Fire Doors

There are over 5.000.000 fires starting throughout the world for a year and thousands of people loosing their lives, while millions are injured and most of them carrying these signs till the end of their lives. Fire doors are the life savers in such cases, which allows people to evacuate most effectively. It also allows people to breath for a longer time since there are smoke seals on these products preventing the lethal smoke outside.

Fire doors are one of the most important fire fighting equipment existed in a building like hospitals, governmental offices, airports, shopping malls etc. It's essential to have these kind of doors in every kind of a building forced by similar regulations across the World.

CERTIFICATION

Fire doors are tested according to EN 16034 standards for either 30, 60, 90 or 120 minutes of time. The class E30 refers the door is resisting the smoke spread for 30 minutes meanwhile the classification EI120 refers that the door is resistant to smoke spread for 120 minutes, in addition resistant to heat for 120 minutes as well. We, as B-TORC, are living with the pride of having ability to manufacture both E & EI classification over 120 minutes of resistant time.

E30-E60-E90-EI20 CLASS FIRE DOORS

- Cold rolled sheet steel via 1.5 mm thickness on casing and 0,9 mm on leaf
- 6 cm of thickness on leaf
- Rockwool to be used in the leaf for sound and heat isolation
- Hot-cold smoke tape used on both casing and on the leaf
- Electrostatic paint on casing and on the leaf
- 2 pcs of hinges, 1 with spring

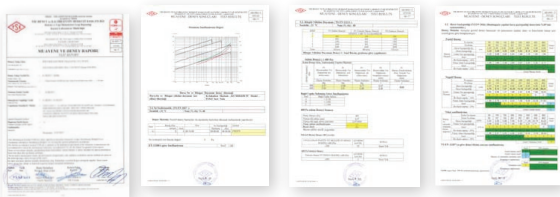

EI30-EI60 CLASS FIRE DOORS

- Cold rolled sheet steel via 1.5 mm thickness on casing and 0,9 mm on leaf
- 6 cm of thickness on leaf
- Rockwool and plasterboard to be used in the leaf for sound and heat isolation
- Hot-cold smoke tape used on both casing and on the leaf
- Electrostatic paint on casing and on the leaf
- 2 pcs of hinges, 1 with spring

EI90-EI120 CLASS FIRE DOORS

- Cold rolled sheet steel via 1.5 mm thickness on casing and 0,9 mm on leaf
- 6 cm of thickness on leaf
- Ockwool and plasterboard to be used in the leaf for sound and heat isolation
- Hot-cold smoke tape used on both casing and on the leaf
- Electrostatic paint on casing and on the leaf
- 2 pcs of hinges, 1 with spring

Multilayer Parquet

Multilayer parquet consists of two or three layers interconnected at an angle of 90 degrees. The upper layer of multi-layer parquet is made of hardwood, and the other layers, which are below the upper, are also 100% made of wood (fir, pine or spruce wood, as well as back veneer of the same wood species).

Multilayer parquet consists of the following layers:

Parquet face protection - glossy or matt varnish;

The upper layer of parquet made of hardwood;

The middle layer of slats stacked so as to give stability to the parquet board;

Back balancing layer - stabilizes the board, giving it the necessary dimensional stability.

The multi-layer parquet is factory varnished and ready for installation immediately after purchase.

ADVANTAGES OF MULTILAYER PARQUET

Multilayer parquet is safe, stable (factory stabilized) and long-lasting.

CHARACTERISTICS

We deliver multilayer parquet in boards ready for installation, of different dimensions according to the customer's wishes.

It is installed without gluing, by fitting the boards with the most modern system that provides a safe, strong and almost invisible joint (if desired, a visible joint with beveled edges can be made).

Multilayer parquets are made of the highest quality wood.

Kitchens

Kitchens are made of MDF in different finishes: veneer, lacquered MDF, melamine foil or pvc finish.

Possibility of making fronts with different profiles and finishes.

Installation with high-quality hardware, possibility of self-closing hinges and sliders (soft-close).

We also install accessories according to customer wishes: options for built-in elements in drawers, various types of sliding elements and accessories for lower and upper elements.
